Create Video Assignment Folder on Panopto

Last Modified on 01/09/2025 9:20 am HKT

Overview

- Panopto has been migrated to AWS Singapore region. The Cloud AWS system offers better performance and higher availability.
- This article shows the steps to create a video assignment folder on Panopto.
- Please also go through the remarks and best practices as well.

Step-by-Step instructions

- I. Create assignment folder on Panopto
 - 1. Access "Panopto" in Blackboard Course.

	An assignment folder is a special subfolder that allows users that can view this folder to create and submit sessions privately. As a creator for this folder, you can see and control all content submitted to the assignment folder.					
	Close					
	Closing an assignment folder prevents viewers of this folder from accessing and adding content to the assignment folder. The assignment folder and its content will remain accessible to you as a creator.					

- II. Rename the assignment folder name (optional)
 - 1. Click on the assignment folder.

Remarks

- Creator can only create one assignment folder inside a folder.
- By default, students can only see their own videos in the assignment folder after the submission. Please remind students NOT to change the 'Who has access' option under 'Share'. Changing the option can make the video accessible by anyone at CUHK, or even anyone with the link.
- If you want to allow viewers to see others' videos: Open the Settings menu for the Assignments folder and navigate to the Settings tab. Select the checkbox next to Allow viewers to see each other's sessions (Panopto Support: How to Allow Viewers to Record Videos Using Assignment Folders
- (https://support.panopto.com/s/article/Use-Assignment-Folders-for-Student-Recordings)).
- No batch video files download.

Best Practices

- 1. Create a trial Panopto Assignment folder for students to have a trial before the assignment submission.
- 2. Divide students into groups for different submission deadlines to avoid uploading videos at the same time.
- 3. If possible, ask students to reduce video size of the assignment. Shorten the video length for one file.
- 4. Provide instructions for students to upload videos in correct format.
 - Panopto Support: Learn About Supported Media File Types for Uploading (https://support.panopto.com/s/article/Supported-File-Types)
- 5. Remind students to check if the video can be successfully processed the next day.
- 6. Prepare contingency plan in case there are any issues regarding video assignment submission on Panopto.E.g. Students can upload their videos to cloud (e.g. OneDrive) and share the video link with you:
 - OneDrive for Business (https://www.itsc.cuhk.edu.hk/all-it/email-messaging-and-collaboration/onedrive-for-business/)
 - Note: CUHK staff and students are separated groups under "The Chinese University of Hong Kong"
 - Students have to share their videos as "Anyone with the link" with staff, or
 - Staff can apply for a project account in "student cloud" to access the video
